2023 – 2024 📌 **M.A. Economics, Collegio Carlo Alberto (CCA), Italy**

2020 – 2022 📌 **M.A. Economic and Financial Analysis, University of Palermo, Italy**

Thesis title: The regional economic effects of Climate Change Policies (CCPs).

Thesis description: After constructing a dataset that includes the regional employment level and the Environmental Stringency Index (ESI) at the country level, we estimate the impulse response function of the regional employment concerning a unit increase of the ESI index, through the local projection method proposed by Jordà. We use different data sources and Python to create a new dataset. Also, we use STATA to write the code for the local projection method.
